The Caribbean coastline has many good natural harbors. However, Cristobal, at the Caribbean terminus of the canal, had the only important port facilities in the late 1980s. The many islands of the Archipiélago de Bocas del Toro, near the beaches of Costa Rica, made an extensive natural roadstead and shield for the port of Almirante. The over 350 San Blas Islands, near Colombia, are spread out for more than 160 km along the sheltered Caribbean coastline.

#### Playa Las Lajas

Playa Las Lajas is a beautiful beach that extends for more than 13 km (8 miles) along the Gulf of Chiriquí on the Pacific Coast. With little current and perfect water temperatures, Las Lajas is ideal for swimming and bodysurfing. Rustic shacks and cheap restaurants are clustered on the beach at the end of the road. For now it remains a hidden treasure still undiscovered by the large hotel chains and hordes of tourists.
